Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

BATTERY WITH GRID

Examiner: Yuan S.N. 09/351,418 Art Unit: 1745 March 17, 2003

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 39-95, 115-126, drawn to a method of making a battery (grid), classified in class 29, subclass 2.
 - II. Claims 96-114, drawn to a grid for a battery, classified in class 429, subclass 233.

The inventions are distinct, each from the other because of the following reason:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). As admitted in the subject matter of the present claims, the battery grid can be fabricated by distinct manufacturing procedures as recited in claims 39-58, 59-68, 69-77, 78-86, 87-95, 115-124, and 125-126, respectively.

3. If invention I is elected, an election of species is required. This application contains claims directed to the following patentably distinct species of the claimed invention.

I-1, Claims 39-58, drawn to a method of making a battery comprising forming a strip of interconnected grid from a grid material, forming at least a portion of the grid elements, applying paste to the strip and cutting the strip.

I-2, Claims 59-68, drawn to a method of making a battery comprising forming a strip of interconnected grids from a grid material, forming at least a portion of the grid elements and cutting the strip.

I-3, Claims 69-77, drawn to a method of making a battery comprising melting a grid material, continuously casting the grid material to form a continuous strip, rolling the strip, punching grid material, stamping at least a portion of the grid elements, applying paste to the strip and cutting the strip.

I-4, Claims 78-86, drawn to a method of making a battery comprising casting a material to form a continuous strip, rolling the strip, punching material out of the strip, stamping at least a portion of the grid elements, applying paste to the strip and cutting the strip.

I-5, Claims 87-95, drawn to a method of making a (battery) grid comprising forming a perform grid, and forming at least a portion of the grid elements of the perform grid.

I-6, Claims 115-124, drawn to a method of making battery plates comprising forming a strip of interconnected grid from a grid material, deforming at least a portion of the grid elements, applying paste to the strip and cutting the strip.

I-7, Claims 125-126, drawn to a method of making battery plates comprising forming a strip of interconnected grid from a grid material, deforming at least a portion of the grid elements, and cutting the strip.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims directed to invention I is generic.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

Art. Unit: 1745

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dah-Wei D. Yuan whose telephone number is (703) 308-0766. The examiner can normally be reached on Monday-Friday (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick J. Ryan, can be reached on (703) 308-2383. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9310 for regular communications and (703) 872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-2340.
